

LAWN WEED CONTROL BASICS

1. Apply a good pre-emergent like Ferti-lome Avert. Avert controls broadleaf weeds for 8 months and grassy weeds for 3 months. Water in well. Avert also fertilizes your lawn.
2. Allow your lawn to dry
3. Cut your lawn
4. Immediately apply Fertilome Weed Out at a rate of 3-4 oz./1 gal. of water using a hose-end sprayer.
5. Do not water your lawn again for 5 days. This allows the Weed Out to attack the foliage of the weed from the top of the plant.
6. After 5 days water your lawn thoroughly and the chemical will move down to the roots.
7. Expect a good kill of the broadleaf weeds within 10 days to 2 weeks of application.
